

ASSOCIATED PRODUCTS

Greentree-Shercon can supply an extensive range of associated products suitable for the surface finishing industry. These include:

MAGNETIC MASKING (90°C/ 240°C)

A range of different thickness magnetic sheet which can be cut to your design. Available in gloss, plain or adhesive backed. Used on its own it will withstand temperatures to 90°C.

Used in conjunction with silicone rubber or metal sheeting it can withstand temperatures of 240°C.

SILICONE FOAM (250°C)

Suitable for complex masking of irregular shaped holes, channels and recesses. High flexibility on tolerances of threaded and plain holes.

Available as sheeting in sizes from 1mm to 4mm and also in cylindrical and rectangular cord format.

PROTECTION/ MASKING COVERS (150°C)

Polythene or paper covers providing excellent protection masking components during manufacture. Ideal for wet paint, pre-treatment and other spray applications where large areas or shapes require protection. Elasticated or adhesive sealed. Can be provided with a corrosion inhibitor to protect metal components during manufacture, transport and storage.

O-RINGS (250°C)

A wide choice of O-Rings, gaskets and seals in a selection of diameters, cross sections and materials.

EDGING STRIPS (250°C)

Custom designed reusable edging strips in different materials, ideal for masking or protecting plain or profile edges.

HEAT SHRINK (250°C)

We can provide an extensive range of heat shrink tubing which can be used for masking irregular shaped components.

NYLON SELF THREADING PLUGS (82°C)

For taps and threads over a wide range of sizes. Self tapping and leak proof seal for a threaded hole. Used in the plating, anodising and spray painting industries.

IDENTIFICATION / INSPECTION ARROWS / DISCS

A range of different size identification and inspection arrows and discs in 7 standard colours including fluorescent. Available on rolls in either paper or vinyl. Remove cleanly and can be used indoors or out.

STARTER KITS

Each starter kit contains a useful selection of compatible products (e.g silicone plugs) in a sturdy reinforced box. Ideal for low volume work or prototypes. Can be customised.
